

BIG STICKY INSULATION ADHESIVE INTRODUCED

Rockland, MA (November 2, 2006): The makers of STA'-PUT® and Foamseal® adhesives has introduced ***Big Sticky Insulation Adhesive*** for bonding insulation batting to interior wall cavities. The aerosol canister adhesive is available under the STA'-PUT brand name in 23 lb. canisters (net weight) and boasts aggressive grab tack, fast dry time, long working time and superior coverage.

"The canister offers the control, mobility and efficiency our customers demand", said ITW TACC MH/RV Business Manager Mike Dincolo. "For insulation, ***Big Sticky*** is ideal for increasing plant throughput in virtually every kind of factory-built construction."

Big Sticky's aerosol canister offers an adjustable spray pattern for controlled dispersion and 100% transfer efficiency of adhesive to substrate. The self-contained canister requires less time to set-up, maintain and clean equipment than other application methods.

ITW TACC, a division of Illinois Tool Works, develops and manufactures brands of high performance adhesives used in woodworking, building construction, HVAC, roofing, manufactured housing, transportation and marine.
